# The Clenaware Experience

Delivering Perfect Results Every Time

## Delivering Perfect Results Every Time

To serve the perfect drink you need a perfectly clean, perfectly dry glass. The state of the glass at the point of presenting the drink is an essential element in customer satisfaction. Why compromise customer satisfaction?

The characteristics of a glass that is "Fit to Fill" or "Beer Clean" can be summarised as being:

- Free Rinsing
- Visually Bright
- Disinfected
- Odour-Free
- Cool and Dry

At Clenaware we are passionate about our brand and our products. We believe that everything we do, from design and manufacturing, through to the after sales we provide, should achieve that goal of "Delivering Perfect Results" every time. At Clenaware, "Excellence comes as standard".

### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

**Did you know?** It is estimated that there are 400 quality checks carried out during the production of beer. This effort will be wasted at the point of presenting the drink to the customer if key "Fit to Fill" or "Beer Clean" criteria on the washed glass have not been met.

# Treat It

## Water Treatment & Chemicals

### Water Treatment

Limescale isn't just unsightly, it's also another factor preventing the delivery of perfect results. Contaminates and scale found in water can't always be removed, and these contaminants will ultimately flatten and effect the appearance of drinks. Water treatments are not only beneficial, they are also necessary for delivering perfect results.

Clenaware can supply, install and maintain:

Calcium Treatment Units

Automatic Water Softeners

Manual Water Softeners

- Calcium Treatment Units
- Calcium Treatment Exchange Units
- Automatic Water Softeners - Cold
- Automatic Water Softeners - Hot
- Manual Water Softeners
- Salt

### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

### Chemicals

High quality chemicals are essential for cleaning and drying glasses, they are also essential for renovating glasses and for looking after your glass washer. Chemicals play an important part in the overall processes of achieving perfect results.

Clenaware can supply:

Descaler

Lipstick Removal

Renovate

Glasswasher Detergent

Glasswasher Rinseaid

Polycarbonate Glass Washing Pack

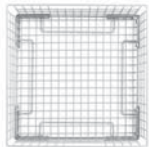

**Did you know?** Good quality chemicals are formulated to cope with high levels of tannins, proteins and water hardness, and they aid the drying process by shedding as much excess water from the glass as possible and preventing 'spotting'.

# Prepare It

## Baskets

With many different styles of glassware in constant use, ensuring you choose the right basket to wash them in is more important than ever. Baskets now come in a range of different sizes and styles, which have been designed specifically with each individual style of glassware in mind.

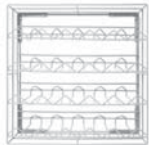

Clenaware can supply:

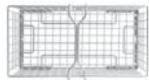

Open Glass Baskets  
Sizes: 400mm<sup>2</sup> / 450mm<sup>2</sup> / 500mm<sup>2</sup>

Divided Glass Baskets  
Sizes: 400mm<sup>2</sup> / 450mm<sup>2</sup> / 500mm<sup>2</sup>

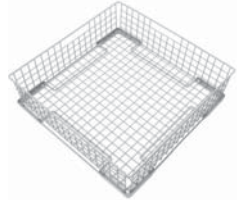

Tall Glass Baskets  
Sizes: 400mm<sup>2</sup> / 450mm<sup>2</sup> / 500mm<sup>2</sup>

Half Glass Baskets  
Sizes: 400mm x 200mm / 450mm x 225mm / 500mm x 250mm

### Open Glass Baskets

The Open Glass Basket is suitable for glasses that measure up to 150mm, such as Pint Glasses, Tumbler Glasses, Half Pint Glasses and Hi Ball Glasses. The basket comes with offset hand slots (making it easier to handle) and is coated in a 'premium' plastic coating for added hygiene and durability.

### Divided Glass Baskets

The Divided Glass Basket is suitable for specialist style glasses that measure up to 150mm, such as Shot Glasses, Cocktail Glasses, Champagne Glasses and Wine Glasses. The basket is compartmented and angled to aid the drying process and to prevent glass damage.

### Tall Glass Baskets

The Tall Glass Basket is suitable for Continental style glasses that measure over 150mm in height. This includes glassware such as Pilsner, Peroni and Heineken Glasses. The basket is compartmented and angled to aid with the drying process and also has special glass support inserts to safely accommodate taller glasses.

### Half Glass Baskets

The Half Glass Basket has been designed by Clenaware Systems as a versatile basket and has two individual uses. The basket can be used as a glass carrier for staff collecting glasses and has a durable carry handle making it easy and comfortable for staff to carry. The basket can also be used in the glass washer and is ideal when only wanting to wash a small volume of glasses. The basket comes with four corner clips as standard, and is coated with a premium plastic coating for added hygiene and durability.

#### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

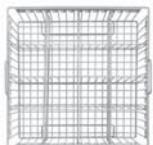

**Did you know?** The wider spaces between the wirework ensures that the water from the wash and rinse jets have a larger area to get through. This ensures that the glasses are washed and rinsed more thoroughly. This means there's no escape for grease and dirt!

# Prepare It

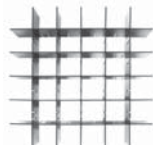

## Baskets

With many different styles of glassware in constant use, ensuring you choose the right basket to wash them in is more important than ever. Baskets now come in a range of different sizes and styles, which have been designed specifically with each individual style of glassware in mind.

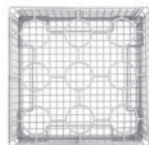

Clenaware can supply:

Compartmented Glass Baskets  
Sizes: 400mm<sup>2</sup> / 450mm<sup>2</sup> / 500mm<sup>2</sup>

Divider Kits  
Sizes: 400mm<sup>2</sup> / 450mm<sup>2</sup> / 500mm<sup>2</sup>

Carafe Insert  
Sizes: 470mm<sup>2</sup>

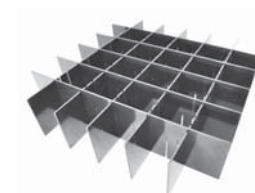

### Compartmented Glass Baskets

The Compartmented Glass Basket with adjustable inserts and carry handles, allows you to use the basket in several different ways. Remove all the inserts to use it as an open basket, use the horizontal inserts for a divided version, or use the horizontal and vertical inserts for a compartmented version allowing you to wash all styles of glassware.

### Divider Kits

The basket Divider Kit is suitable for use in a 40, 45 or 50 size glass washing basket. The plastic inserts can be put together in a matrix to make a maximum of 36 compartments allowing you to turn a standard open basket into a more versatile basket, enabling you to wash a number of varied glassware items instead of having to use separate baskets for specific glass styles.

### Carafe Insert

The Carafe Insert is used for washing Wine Carafes and Decanters, which in normal standard glass washing baskets would probably topple over resulting not only in breakages but also the Carafes not being thoroughly cleaned. The insert is designed to fit inside a 500mm<sup>2</sup> (50 size) basket.

#### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

**Did you know?** The wider spaces between the wirework ensures that the water from the wash and rinse jets have a larger area to get through. This ensures that the glasses are washed and rinsed more thoroughly. This means there's no escape for grease and dirt!

# Wash It

## Glass Washers

The Sovereign Glass Washer is more than just a brand; it's a brand with an ethos of 'attention to detail', where it marries experience and quality workmanship to leave you delighted every time.

### Fresh Water Wash

Unlike other machines that reuse the wash water, the Sovereign Glass Washer is a "Fresh Water Wash" machine which always ensures the last wash is exactly the same as the first. The "Fresh Water Wash" system replaces the water every time, and what's more, the rinse water is always fresh to ensure that you obtain the same consistent "Perfect" result every time.

### Plastics Wash Cycle

The Sovereign Glass Washer has a dedicated "Plastics Wash Cycle", designed for washing plastic / polycarbonate glasses. The "Plastics Wash Cycle" adopts the correct washing process for plastics and therefore results in a much better wash. It also helps to prolong the life span of plastic glasses.

### Dedicated Renovate Cycle

The Sovereign Glass Washer has a dedicated "Renovate Cycle" for renovating glasses. This cycle removes the build up of non-rinsable films to make glasses like new again. The dedicated "Renovate Cycle" is unique to Clenaware machines; it can be run at any time without the need for emptying and re-filling the machine.

#### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

Sovereign  
Sizes: 45 - 50

Sovereign Lite  
Sizes: 45 - 50

### Integrated Design

The Sovereign Glass Washer is designed to be a fully integrated machine with everything that you need built into it. The Sovereign Glass Washer includes a rinse booster pump, a waste pump and chemical injection and sensing\*. It also includes a built-in self diagnostics system and is WRAS approved.

CE Marked:	Yes

\*Not available with the Sovereign Lite

**Did you know?** Clenaware Systems has been designing and manufacturing ware washing equipment for over 50 years and we are a UK company that only designs and builds its products in the UK.

Dry It

Glass Dryer

The **AIRACK**

The Airack dries glasses in just 4 minutes... Put quite simply, The Airack is the "4 Minute Marvel"

### Dry In Just 4 Minutes

To serve the "Perfect Drink" you need a dry glass. The Airack Glass Dryer will dry up to 30 pint glasses in just 4 minutes. Do away with tea towels or paper towels and simply place the basket on the Airack and hit "Start". Just four minutes later, you will have a completely dry glass in which to serve the "Perfect Drink".

#### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

Airack  
Sizes: 40 / 45 / 50

Airack Lite  
Sizes: 40 / 45 / 50

### Airack

The standard Airack has an automatic 4 minute timer, a drain funnel for excess water and an air filter. The Airack is available in three different sizes; 40, 45 and 50.

### Airack Lite

The Airack Lite is the sister of the Airack and comes with a manual timer that can be set up to 30 minutes, water drainage via the top cover and no air filter. The Airack Lite is available in three different sizes; 40, 45 and 50.

### Airack Stands & Branding

The Airack stand is the perfect addition to the Airack. It provides the correct working height and can be provided with a Tundish to drain away excess water. The stand also has storage space for two further baskets and can be either static or mobile. The Airack can also be supplied with custom branding.

### Easy To Install & Use

The Airack Glass Dryer is simple to install and use. It plugs into a standard 13 amp plug and has one control button... "Start". Simply remove the basket from the glass washer machine, place on the Airack and push "Start". Wait 4 minutes and you will have perfectly dry glasses.

Model:	Airack or Airack Lite	Basket / Racks Per Hour:	Up to 15
Machine Type:	Counter Top or Stand Mounted	Basket / Rack Capacity:	Up to 30 Pint Glasses
Electrical:	Single Phase 3 Amp	Standard Cycle Time (mins):	Automatic - 4 Minutes Manual - Up to 30 Minutes
Machine Finish:	Recycled Plastic	Control System:	Electronic / Manual
Colours:	Black	Manufactured to ISO 9001 : 2008	Yes
Sizes:	40, 45 or 50	CE Marked:	Yes
Basket / Rack Size:	400mm <sup>2</sup> up to 500mm <sup>2</sup>		

**Did you know?** After being washed, glasses take up to 40 minutes to dry on a ventilated shelf. On the Airack they take just 4 minutes! There is no other product like it, why? Because we invented the idea!

# Store It

## Basket Units

The correct storage of your glassware contributes to the achievement of a perfect result and makes the results safer and more hygienic.

### Static and Mobile Units

Storing glasses correctly will prevent cross-contamination and dampness which can result in a poorly presented, tired-looking, flat-tasting and past-its-best drink.

Basket units are ideal as glasses are stored in the unit using the correct basket from the glass washer & Airack, this means less handling of the glasses, and results in no cross-contamination and good ventilation during storage.

Clenaware can supply:

3 Tier Static  
Basket Units  
Sizes: 40, 45 and 50

3 Tier Mobile  
Basket Units  
Sizes: 40, 45 and 50

5 Tier Static  
Basket Units  
Sizes: 40, 45 and 50

5 Tier Mobile  
Basket Units  
Sizes: 40, 45 and 50

### Storage Solutions

Clenaware basket units are available as 3 or 5 tier high units and as static or mobile. All basket units are made from solid stainless steel making them durable and robust. All basket units are supplied with catch trays as standard.

### Static Units

Static basket units slide snugly and easily into spare space in the bar area, ideally next to your Glass washer and Airack glass dryer. Static basket units are available as 3 or 5 tier high units.

### Mobile Units

Mobile basket units are designed for easy movement around the bar area. As standard they come with braked castors for safety once the unit is in position for storage. They are available as 3 or 5 tier high units.

### Durable

The basket units are made of solid Stainless Steel and so not only look 'swish', but are able to handle the knocks and bumps of a busy bar area. All basket units are supplied with high quality catch trays as standard.

### Versatile Baskets

All Clenaware basket units are versatile allowing you to store all basket types, be it the standard open basket with pint glasses or the tall glass basket with the taller Continental style glasses.

#### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

**Did you know?** By placing clean and properly dried glassware onto a shelf or beer towel, the risk of cross-contamination and dampness getting inside the glassware is high, resulting in poorly presented, tired-looking, flat-tasting and past-its-best drinks.

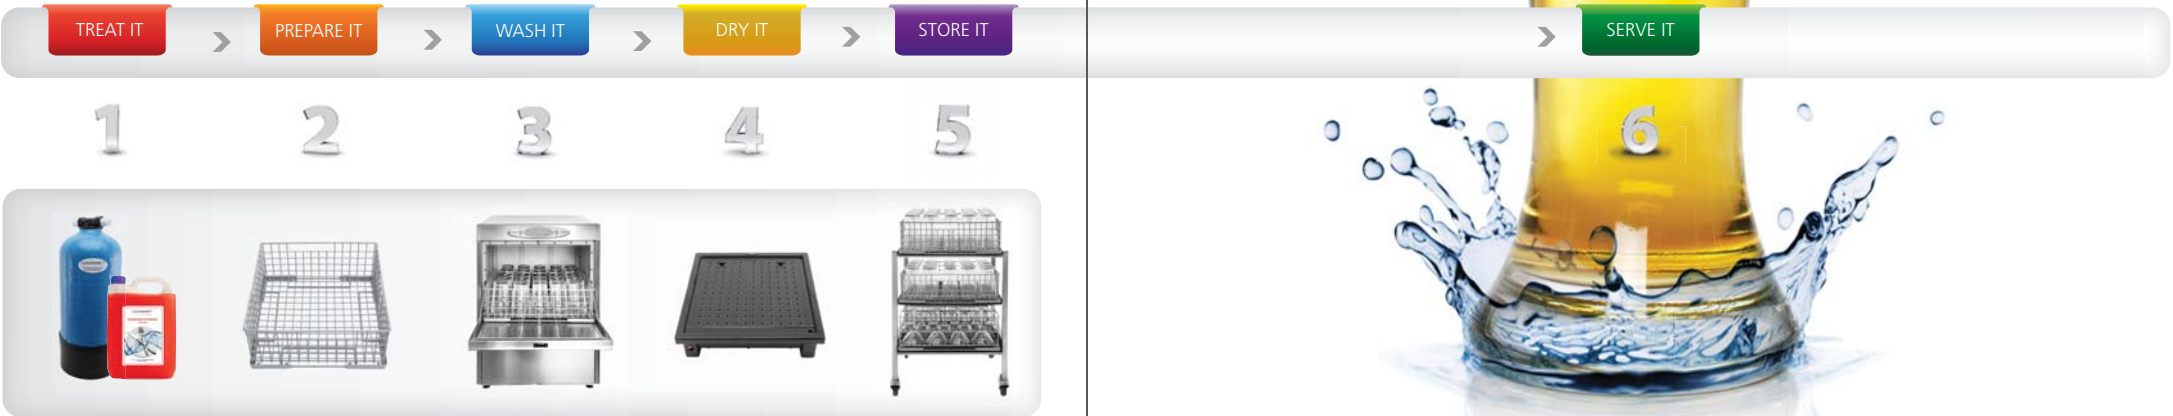

# Serve It

With a smile

It's so much easier to serve the perfect drink when you have the perfect glass. Presenting the drink in a clean, dry glass improves "two" key factors towards customer satisfaction... the taste and the look. All you need to do is add the smile. Why compromise customer satisfaction?

The Clenaware Solution:

**Clenaware Systems Limited**

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

**Did you know?** Did you know that in Britain alone, an adult will drink an average of 6000 pints in their lifetime. That's a lot of pints, not to mention hangovers!

# Service It, Support It

ClenaCare

ClenaCare is a support service offered by Clenaware Systems for all our products to ensure that the "Clenaware Experience" is the best that it can be.

## Clenaware Monitoring System (CMS)

The Clenaware Monitoring System allows for the complete management of the Clenaware machine and records and reports through an easy to use online interface that users can access on a real-time, 24/7 basis from any internet enabled PC. The CMS also allows for the management of multiple machines across single locations or estates.

- Access to real-time machine data through any standard Internet Browser
- Access to a wide range of machine usage reports and audit trails
- Monitoring of items such as the consumption of power, water and consumable parts
- Complete tracking of machine history
- Identifying service and maintenance issues before they arise
- Reducing engineer call outs and costs whilst increasing the first time fix rate

The Clenaware Monitoring System offers many key benefits, however, the biggest benefit is that support and service can be offered in a more pro-active way as it takes away many elements of the re-active support that tends to happen with commercial equipment.

### Clenaware Systems Limited

44 Huxley Close, Park Farm Industrial Estate, Wellingborough, Northamptonshire NN8 6AB  
Tel: 01933 666244 • Fax: 01933 665584 • Email: info@clenaware.co.uk • www.clenaware.co.uk

## Machine Installation

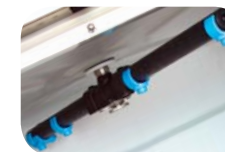

We offer a complete Installation, Removal and Disposal service for your new or replacement Clenaware machine. The Installation, Removal and Disposal service covers all machines in the Clenaware range and is carried out by trained Clenaware engineers.

## Machine Maintenance Service

We offer a complete Machine Maintenance Service package which is designed to provide maintenance and service to your Clenaware machine, ensuring that it continues to provide first class results. Like all equipment, a regular service provides long term benefits for the machine and its life span. All Machine Maintenance Services are carried out by trained Clenaware engineers and include any service parts that need to be replaced.

## Machine Assessment

A Clenaware machine assessment service can be offered as an alternative to fixing a problem or breakdown there and then. The machine assessment service has been introduced to help customers gain a better understanding of the condition of their machine. The machine assessment service involves an engineer visit on site and to spend approximately 1 hour assessing the whole machine. The engineer will look at all the key aspects and functionality of the machine. Following the assessment, customers receive a full report on the machines condition alongside any recommended actions to bring the machine up to a good working standard. The advantages of this service is that it gives you a full report on the whole machine so that you can make an informed decision on what actions you wish to take.

## Machine Refurbishment

For anyone that has a Clenaware machine we offer a Machine Refurbishment Service. A machine refurbishment can be requested for many reasons; perhaps the machine is unserviceable and hasn't been in use for a while, or maybe a refit means the opportunity to refurbish existing machines. For whatever reason, Clenaware can refurbish machines to the same high standard of any new machine it manufactures.

**Did you know?** The Clenaware Monitoring System allows us to monitor and manage your machine on your behalf. We can solve problems and issues much faster, often in many cases without the need for an engineer to visit.
